

Senior Full-stack / AI Developer (m / f) at SPIKELANDS AG

SPIKELANDS AG is an advertising agency that creates authentic brand experiences thanks to fully integrated multi-channel communication and delivers lasting impact.

Together with our clients, we capture key market insights and develop clear and differentiated communication strategies. We deliver integrated multichannel solutions from concept, design, production to a successful implementation. Systematic analyses allow us to continuously improve, enrich the customer experience and create memorable brand experiences with positive impact.

Due to increased demands in the field of artificial intelligence (AI), machine learning (ML) and healthcare-related applications we are looking for reinforcement in the development team. As a committed full-stack developer you develop, program and document innovative AI and ML solutions and web applications.

Your tasks:

- Analysis, planning and agile software development of innovative web applications (front / back end)
- Maintenance of implemented solutions; Follow-up tickets requests (bugs, new jobs, change requests, etc.,)
- Creation of high quality documentation in the field of AI and web services
- Ensuring compliance according to customer requirements, adherence to regulatory provisions (e.g. GDPR) around our AI solutions
- Identify improvements, make suggestions and implement them accordingly once approved for development
- Independent implementation, as well as testing and integration of software components

Your profile:

- 3-5 years of experience as front-end / back-end programmer, cross-browser, cross-device and applications.
- Experience with cloud computing / web services or related areas
- Very good knowledge of PHP, JavaScript / TypeScript, CSS / SASS and HTML
- Experience in the following areas:
 - Component-based front-end frameworks, e.g. B. React, AngularJS
 - Node.js-based API technologies, e.g. B. Express, GraphQL
 - CMS such as Symfony, Wordpress, Silverstripe, ModX
 - JavaScript test frameworks, e.g. B. Jest, Cypress

- RestAPI, JSON, XML, Bootstrap
 - WebShop solutions, including Shopware developments
 - Databases like MySQL, PostgreSQL
 - Git, Linux, Docker
 - Agile processes such as Scrum
- An eye for well-designed, intuitively usable web interfaces
 - Strong written and oral communication skills; Teamwork
 - Interest in new technologies and trends, especially in the AI and machine learning environment

We look forward to hearing from you and discussing this exciting position with you. Apply today by email: stefan.flueckiger@spikelands.com or contact us for more information.
